

MMCS Website — Complete Workflow Blueprint

MM Consultancy Solutions (Pvt.) Ltd. | PHP + MySQL | Developer Reference

■ USER (PUBLIC) PAGES — 9 Pages

1	Home Page	Hero banner (MMCS tagline), Services overview cards (6 tiles), Key stats (10+ years, SECP registered), Partner logos, CTA button → Inquiry form
2	About Us	Vision & Mission statements, Three Core Pillars (Development Consultancy, Humanitarian Initiatives, Research & Knowledge), Team intro section
3	Services Page	8 dynamic service cards from DB: MEAL, Reporting, Proposal Writing, Research, Training, Documentation, Digital, Technical Expertise — each links to detail page
3a	Single Service Detail	Dynamic page loaded via service_id URL parameter — full description, sub-services list, related projects, CTA to inquiry form
4	Portfolio / Projects	Grid of past projects from DB — filter by sector (WASH, Education, Climate, Gender etc.), each card shows title, donor, location, year
5	Team / Experts	Expert profiles from DB — name, designation, sector expertise tags, short bio, photo — pulled from team_members table
6	Blog / Resources	Blog posts, policy briefs, reports — DB-driven list with date & category — PDF/file download supported from uploads folder
7	Contact Us	PHP contact form (name, org, email, message) → saves to DB + sends email via PHPMailer — office address, map embed, phone numbers
8	Service Inquiry Form	NGO/INGO quote request form — org name, service type, project details, budget range — saved to inquiries table + auto email to MMCS team

■ ADMIN PANEL PAGES — 10 Pages

A1	Admin Login	Secure login with PHP session — username + password check via DB admins table — failed login attempts logged — redirect to dashboard
A2	Dashboard	Overview widgets: total inquiries, new messages, active projects count, recent activity log — quick links to all manage pages
A3	Manage Services	CRUD for all 8 services — add new service, edit title/description/icon, toggle active/inactive, reorder display position
A4	Manage Portfolio	Add/edit/delete projects — fields: title, client/donor, sector tag, location, year, description, multiple image upload
A5	Manage Team	Add/edit/delete team experts — name, role, photo upload, bio text, sector expertise tags (multi-select)

A6	Manage Blog	Write/edit blog posts with rich text — title, content, category, publish date, attach PDF/resource file, publish/draft toggle
A7	Inquiries & Messages	View all contact form submissions — status badges (New/Read/Replied), reply via email link, delete, export to CSV
A8	Quote Requests	NGO service inquiry requests list — organization, service needed, date, status (Pending/In Progress/Closed), download as PDF
A9	Testimonials	Add/edit client testimonials — client name, organization, quote text, photo, approve/unapprove for homepage display
A10	Site Settings	Update: site logo, company phone/email/address, social media links, homepage stats numbers, footer text — stored in settings table

MySQL Database Tables

Table Name	Key Columns	Used By
services	id, title, description, icon_path, is_active, sort_order	Services page, Admin A3
projects	id, title, client, sector, location, year, description, images	Portfolio page, Admin A4
team_members	id, name, role, photo, bio, expertise_tags, is_active	Team page, Admin A5
blog_posts	id, title, content, category, file_path, published_at, status	Blog page, Admin A6
inquiries	id, name, org, email, message, type, status, created_at	Contact/Inquiry form, Admin A7, A8
testimonials	id, client_name, org, quote, photo, is_approved	Home page, Admin A9
admins	id, username, password_hash, last_login	Admin Login A1
settings	id, key, value	All pages (logo, contact info), Admin A10

PHP File / Folder Structure

Folder / File	Contents	Purpose
/public/	index.php, about.php, services.php, service-detail.php, portfolio.php, team.php, blog.php, contact.php, inquiry.php	All user-facing pages
/admin/	login.php, dashboard.php, services.php, portfolio.php, team.php, blog.php, inquiries.php, quotes.php, testimonials.php, settings.php	All admin panel pages
/includes/	db.php — PDO connection header.php — navbar footer.php — footer auth.php — session check functions.php — helpers	Shared components included on every

/assets/	css/style.css, bootstrap.min.css js/main.js, bootstrap.min.js images/ — static images fonts/	Frontend resources
/uploads/	projects/ — project photos team/ — staff photos blog/ — PDF attachments	User-uploaded dynamic files
config.php	DB_HOST, DB_NAME, DB_USER, DB_PASS SITE_URL, MAIL settings	Root-level config — never expose publicly

■ ■ Technology Stack & Development Steps

Layer	Technology	Details
Frontend	HTML5 + Bootstrap 5 + JS	Responsive layout, MMCS orange/white theme, Font Aweso
Backend	PHP 8+	PDO for DB, Sessions for admin auth, PHPMailer for emails
Database	MySQL 8	8 tables, phpMyAdmin for management, PDO prepared state
File Upload	PHP move_uploaded_file()	Images to /uploads/, max 5MB, type validation (jpg/png/pdf)
Security	password_hash / verify	Admin passwords hashed, SQL injection prevented via PDO
Hosting	cPanel Shared / VPS	Local dev: XAMPP or Laragon — PHP + MySQL built in
Email	PHPMailer + SMTP	Contact form + inquiry auto-reply emails, SMTP via Gmail or

■ Recommended Development Order

Step 1	Setup	Install XAMPP/Laragon → Create DB → Run SQL to create 8 tables → config.php
Step 2	includes/	db.php (PDO connection) → header.php → footer.php → auth.php → functions.php
Step 3	Admin Login	admin/login.php → session start → password_verify → redirect to dashboard
Step 4	Admin Dashboard	Dashboard with DB stats counts → quick links to manage pages
Step 5	Admin CRUDs	Manage Services → Portfolio → Team → Blog (complete CRUD for each)
Step 6	Public Pages	Home → About → Services → Service Detail → Portfolio → Team → Blog
Step 7	Forms	Contact form → Inquiry form → PHPMailer email integration
Step 8	Polish	Mobile responsive check → security audit → SEO meta tags → go live
